

state of kaggle in 2022

Over 23,000 respondents from over 170 countries participated in this year's kaggle survey, allowing us a glimpse into the state of data science and machine learning on the data science learning platform.

Age demographics

*Other includes: C#, MATLAB, Bash, PHP, Go, and Julia

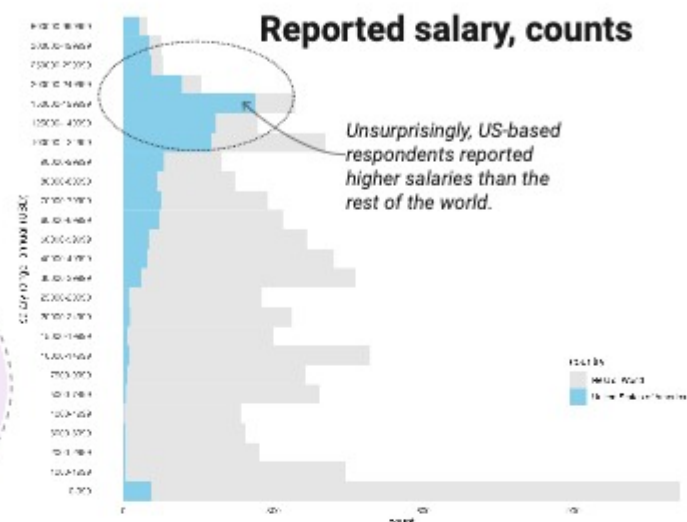

gender

Man

Woman

This gender imbalance expresses itself in several ways

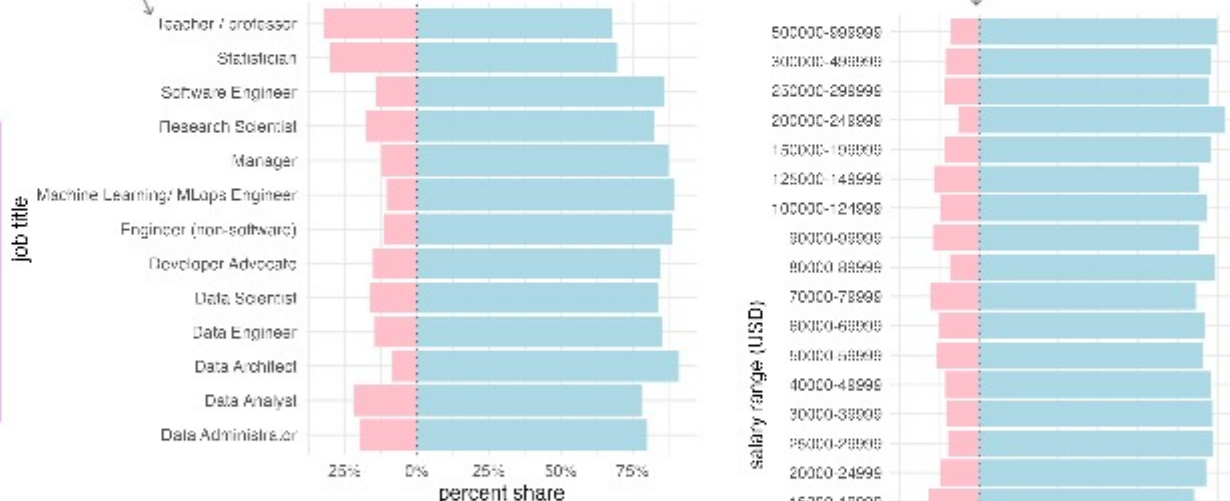

Reported salary, counts

Educators and statisticians represented the highest share of women, per job role.

As you go up along the upper levels of salary ranges, the relative share gets smaller for women

These charts highlight a significant problem in female representation. Male dominated fields like the data science community, or the larger programming community, only worsen the gender-pay gap. Which begs the

What does it tell women interested in the industry that they can expect a highly male-dominated space with very few female colleagues?
